

Legend

The Past is red, the Present is gold, the Future is blue. Each era is represented by a color. In the center of each tri-color wheel is the letter of a specific location. If any color is not present then that location cannot be accessed at that time. For example the Path to Euclid has all 3 colors so it can be accessed during any era, but Harmel only has red so it can only be accessed in the past.

Some letters represent more than one location. For example the Mausoleum is destroyed in the present and becomes Volt's Cave in the future. Items, Magic, and Techs are color coded for the era in which they are found.
